David Aubry, Division Manager
Burlington Environmental, Inc.
734 S. Lucile St.
Seattle, Washington 98108

Dear Mr. Aubry:

This concerns the January 22, 1992, Environmental Protection Agency (EPA) inspection which was conducted at Burlington Environmental, Inc., facilities located at 734 S. Lucile St., Seattle, Washington. The inspection was conducted by W. Douglas Smith to determine compliance with the federal PCB (polychlorinated biphenyl) regulations which were promulgated pursuant to the Toxic Substances Control Act (TSCA).

During the inspection, PCB waste was being stored in areas designated during the inspection as: LW2A, LW3, LW4, CW6 (Bays A, B, and C), and NW6. A review of Burlington Environmental, Inc.'s TSCA PCB commercial storer approval application for this facility does not indicate any storage areas identified in Section B with these designations.

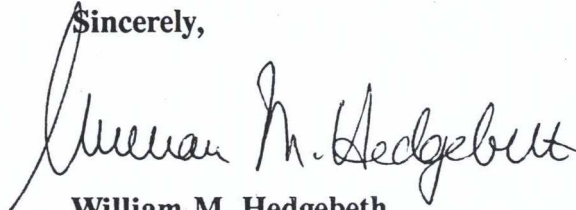

In that regard, please advise whether the PCB storage units identified above are identical to those identified in the TSCA approval application. If so, please identify which areas identified above are equivalent to which areas identified in the application. If the areas identified above are not identified as PCB storage areas in the application, please advise.

If PCB storage areas identified in the TSCA approval application have been redesignated, you should submit an amendment to your application to:

George Abel, Chief
Pesticides and Toxic Substances Branch
Environmental Protection Agency (EPA) Region 10
1200 Sixth Avenue, M/S AT-083
Seattle, Washington 98101

Please provide the requested information within two weeks of your receipt of this letter. If you have any questions, please call me at (206) 553-7369.

Sincerely,

A handwritten signature in black ink, appearing to read "William M. Hedgebeth". The signature is fluid and cursive, with the first name "William" being more prominent.

William M. Hedgebeth
PCB Team Leader
Toxic Substances Section
